

BPI Building Analyst / Energy Auditor Training & Certification

The “Must Have” Certification for HVAC, Remodeling & Energy Contractors Ready to Grow Your Business

Building Performance Institute (BPI) Certification is the recognized national standard for contractors engaged in the growing fields of energy related improvements and energy auditing such as HVAC, weatherization and renewable energy. **BPI certification will be required for participation by contractors in most upcoming utility and federal and state incentive programs.**

- **Become a leader in your industry** by applying “house as a system” techniques in performing home energy system upgrades.
- **Learn how to conduct home energy audits** and/or perform field inspections and building diagnostics necessary to make meaningful recommendations for installation measures that will enhance comfort, health, safety, building durability and energy savings.
- **Take the test to become a Certified BPI Building Analyst**, use the BPI logo in your marketing, get preferred designation from Keystone HELP, utilities and others and separate yourself from your competition!

Class Limited to 12 Students, Register Now!
